

### Storing and Heating:

- Keep your trays frozen until required. We recommend you thaw your meal in the refrigerator prior to heating.
- Conventional oven - preheat to 150°C. Heat for approximately 25 - 35 mins in centre of oven. Test and continue to heat until food reaches desired temperature.
- Microwave oven - place frozen food in microwave-safe container. Heat in the centre of the oven with the container NOT touching the sides of the oven. Heat on HIGH for 3-4 minutes and test. Continue to heat until desired temperature is reached. Be careful as the centre of the food may be very hot.
- Our kilogram packs of chicken schnitzel are sold as either breast or thigh pieces NOT MIXED and separated with freezer wrap to enable separation whilst still frozen.

Our nutritious home-style meals are snap frozen using the latest modern equipment and are sold straight from our freezer to yours—no waste, no fuss & no effort!

We are constantly seeking new products and welcome suggestions from our customers.

Note: we reserve the right to increase our prices from time to time & alter our menu items - this brochure is to be used as a guide only.

### Trading hours:
